Period fo	The MAILING DATE of this commur or Reply	nication appe	ars on the cove	er sheet with the c	orrespondence ad	idress		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonesteel (5,458,314).

Bonesteel teaches a valve stem 12; a hollow valve cone 26 connected to the valve stem 12 and having a greater diameter end region and an smaller diameter end region; and a valve disk 14 closing the valve cone and having a fiat side facing the valve cone, the valve disk and valve cone in a connection region having an at least approximately continuous transition, the valve disk being

Art Unit: 3747

provided on the fiat side facing the valve cone with a recess, the recess defining a centering or supporting seat of the valve disk and the valve cone projecting into the recess with the greater diameter end region of greater diameter, the valve cone being a separate component and fixed at the smaller diameter end region to the valve stem or to a stem connection element provided on the valve disk (see Figure 6).

4. Claims 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Heimann, Jr. et al (5,823,158).

Heimann, Jr. et al teach a valve stem 130; a hollow valve cone 100 connected to the valve stem 130 and having a greater diameter end region and an smaller diameter end region; and a valve disk 160 closing the valve cone and having a fiat side facing the valve cone, the valve disk and valve cone in a connection region having an at least approximately continuous transition, the valve disk being provided on the fiat side facing the valve cone with a recess, the recess defining a centering or supporting seat of the valve disk and the valve cone projecting into the recess with the greater diameter end region of greater diameter, the valve cone being a separate component and fixed at the smaller diameter end region to the valve stem or to a stem connection element provided on the valve disk (see Figures 2-6).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai H. Huynh whose telephone number is (571) 272-

Application/Control Number: 10/579,285 Page 4

Art Unit: 3747

4844. The examiner can normally be reached on Monday through Thursday from 7:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Cronin can be reached on (571) 272-4536. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
